Hazardous Weather

Day 1 Weather Hazards

Valid: 0800 Tue - 0800 Wed

No Significant
Weather Impacts
Expected

- | | |
|--|-----------------------------------|
|  | Very Common – Happens Often |
|  | Common – Happens Frequently |
|  | Uncommon – A Few Times a Year |
|  | Rare – Once Every 1-5 Years |
|  | Very Rare – Once Every 5-10 Years |

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Hazardous Weather

Day 2-3 Weather Hazards

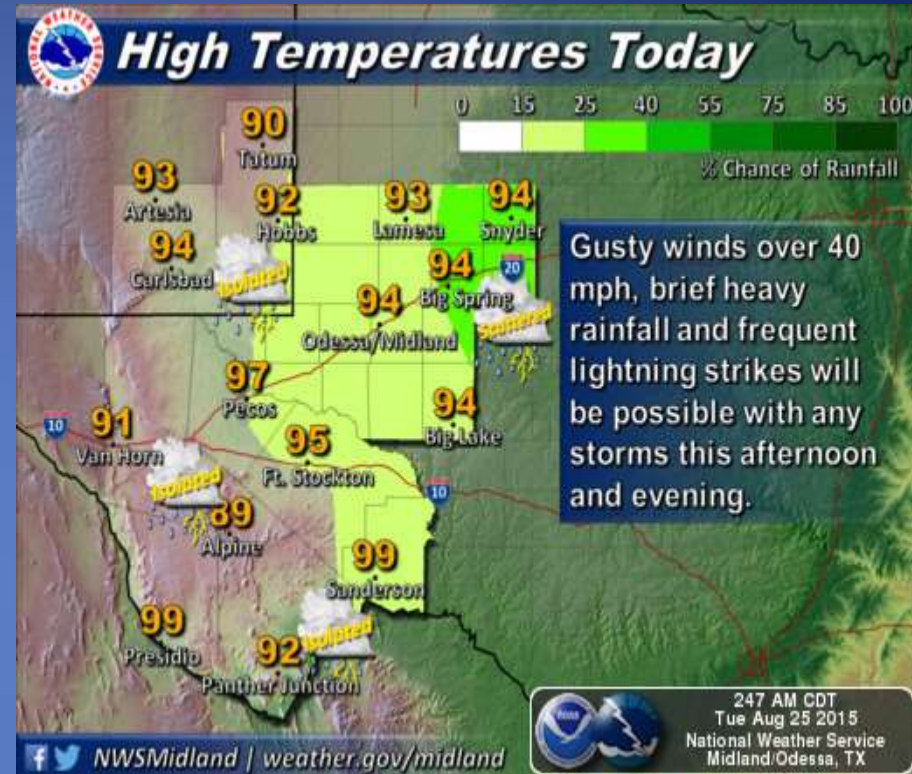

Valid: 0800 Wed - 0800 Fri

Hazardous Weather

A band of showers and thunderstorms generally east of I-35/I-35E and north of I-20 will continue to move south southeast at 10 mph. Cloud to ground lightning and locally heavy rain will accompany some of these storms.

Temperatures will warm to near normal levels this afternoon while scattered thunderstorms are expected to develop over the eastern Permian Basin. In addition, isolated thunderstorms will be possible over the rest of southeast New Mexico and west Texas this afternoon and evening. Gusty winds over 40 mph, brief heavy rainfall and frequent lightning strikes will be the main concerns with any storms.

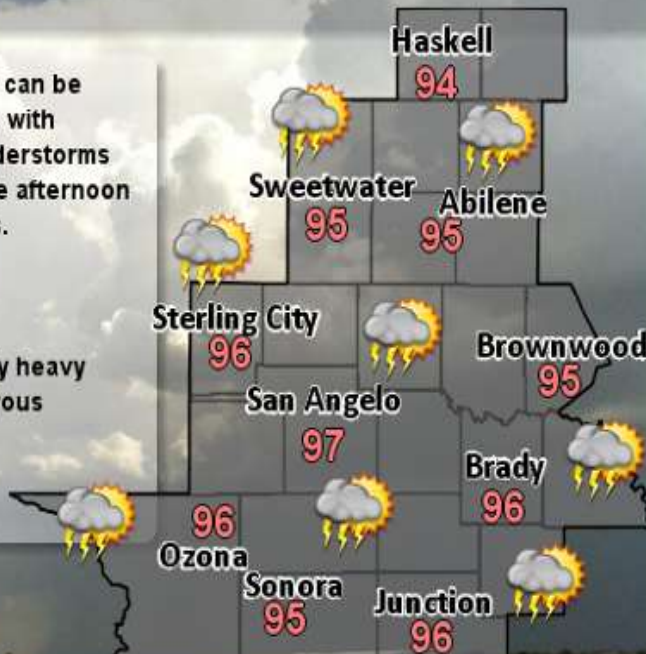

Hazardous Weather

Isolated to Scattered Storms

Partly cloudy skies can be expected Tuesday, with showers and thunderstorms possible during the afternoon and evening hours.

Main hazards:

Gusty winds, locally heavy rainfall and dangerous lightning.

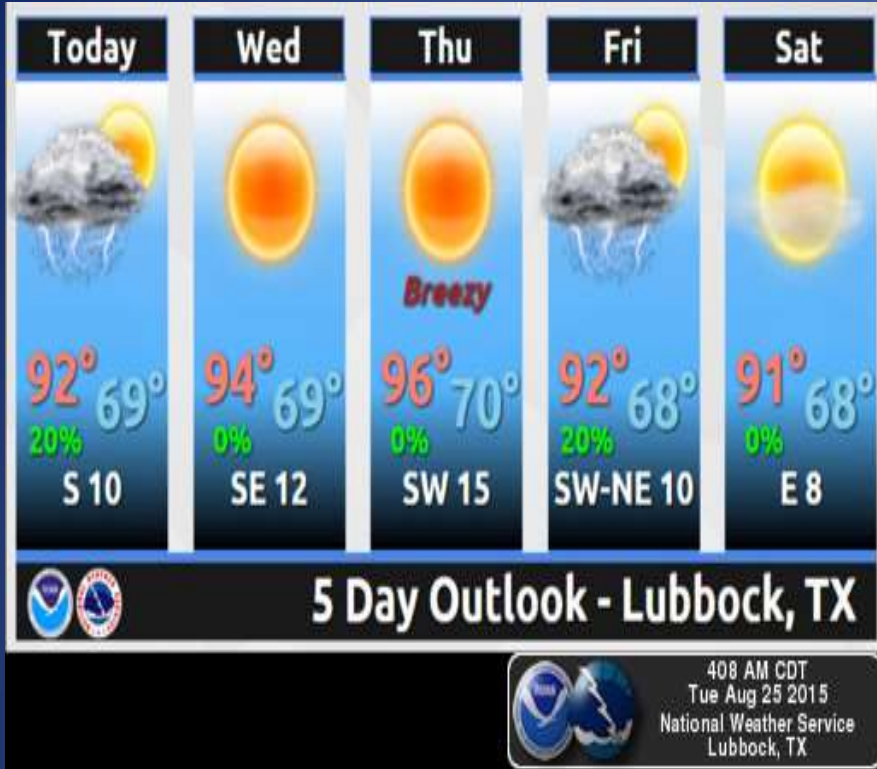

National Weather Service San Angelo, TX Updated: Aug 24 4:22PM

TUESDAY

With high pressure drifting north of the region a bit of drier air will work in from the southeast. However the area will keep plenty of moisture in place to allow for afternoon and evening storm development this afternoon and tonight. There will be more moisture west than east and thus storm chances will be higher west of the Rio Grande than to the east. Temperatures will be near seasonal with a mix of clouds and sunshine.

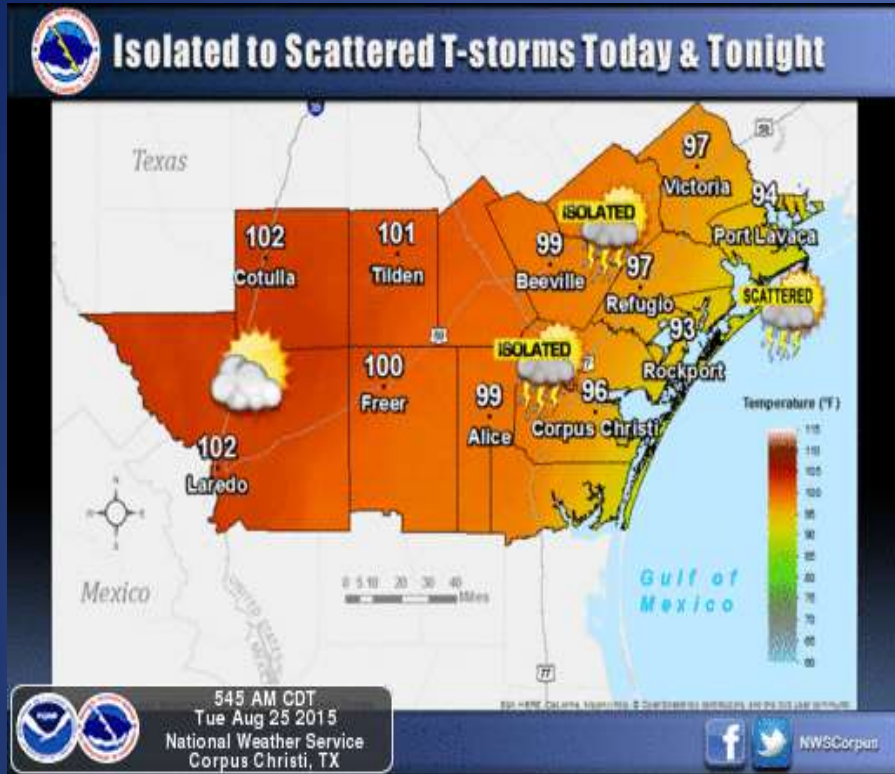

Hazardous Weather

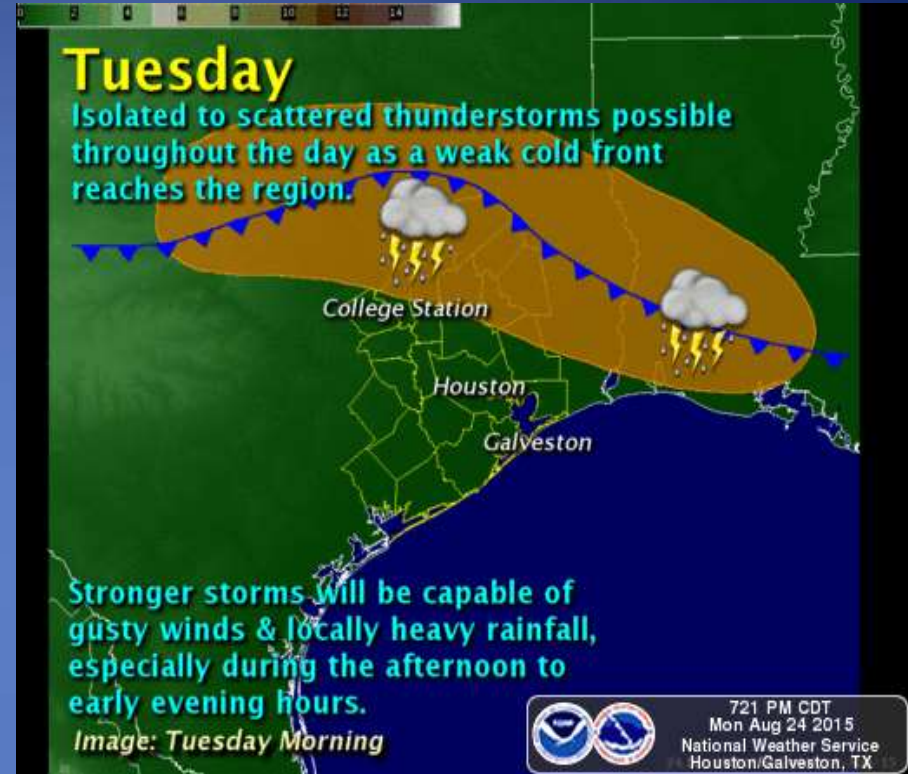

Hotter temperatures await the region, especially by Thursday before a weak cold front arrives on Friday. Just slight chances for showers and storms are expected today and again late Thursday into Friday.

Hazardous Weather

Isolated to scattered showers and thunderstorms will be possible today and tonight across eastern portions of our region as a weak frontal boundary approaches the region. Temperatures today will be similar to yesterday...with heat index values of 105 to 109 degrees expected across portions of the Coastal Bend and Victoria Crossroads this afternoon.

A slow moving cold front will reach the area on Tuesday, increasing chances for showers and thunderstorms across the region. Rain chances associated with this front could linger into Wednesday.

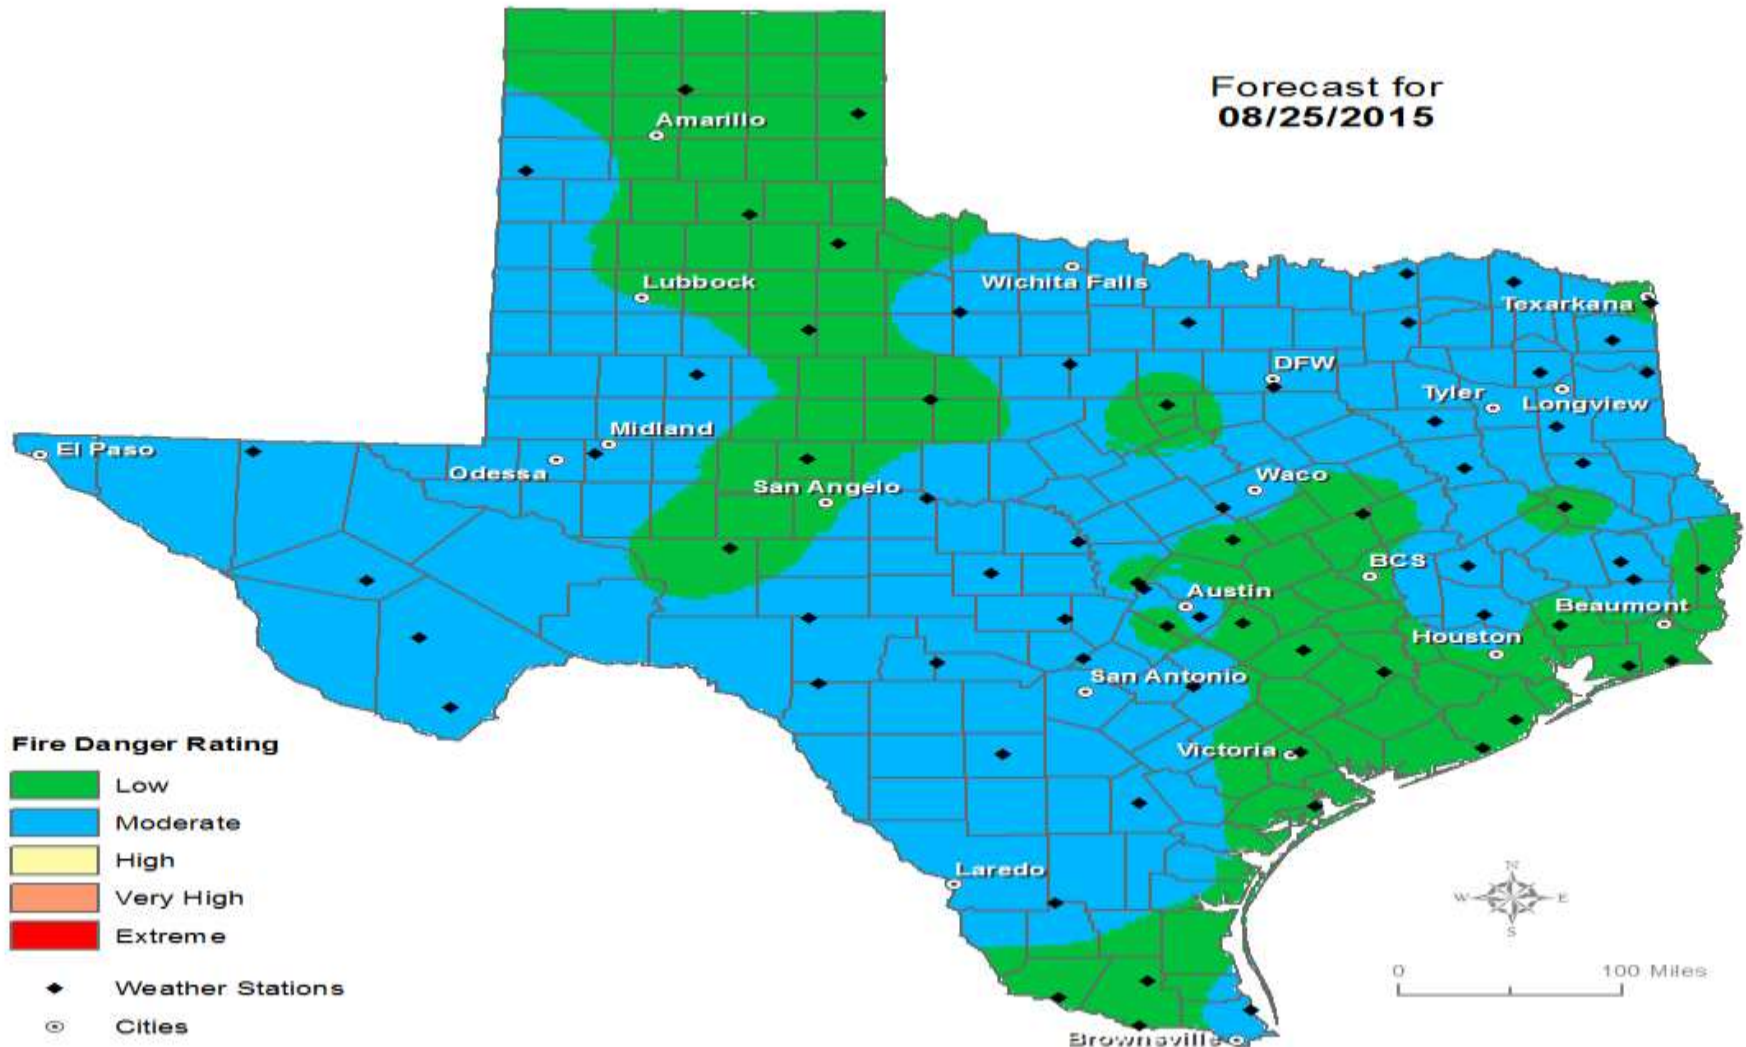

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
08/24/15	Significant Weather Advisory	Dallas, Delta, Ellis, Grayson, Hopkins, Hudspeth, Irion, Jasper, Newton, Nolan, Pecos, Reeves, Rockwall, Sabine, San Augustine, Scurry, Sterling Tom Green and Zapata Counties
